

Dr. Meriam Recertified By American Board of Orthopaedic Surgeons

Green Mountain Orthopaedic Surgery is delighted to announce that Dr. Christopher Meriam has successfully completed the American Board of Orthopaedic Surgeons Recertification Exam. Certification by the American Board of Orthopaedic Surgery means that the orthopaedic surgeon has met the specified educational, evaluation, and examination requirements of the Board.

To achieve this certification, Dr. Meriam had to complete 240 hours of pertinent continuing medical education over the past six years, show evidence of professional standing via peer review, submit case lists and patient survey information and complete a comprehensive one-day, written exam. Congratulations, Dr. Meriam!
